

Metering system DULCODOS[®] modular (DSKa)

Modular and flexible for precise metering

Capacity: 40 – 1,000 l/h

The construction of the DULCODOS[®] modular enables them to be flexibly tailored to your processes. The system is configured via an identity code. The metering systems

are delivered ready mounted and can be quickly and easily installed.

Your benefits

- Simple and fast installation, thanks to its ready-wired design
- Flexible, practical process integration with the identity code "DSKa"
- Minimal space requirement, thanks to compact construction
- Short delivery times due to the use of standard components
- Minimal stock of spare parts

Field of application

Metering of chemicals: Cleaning agents, disinfectants, additives and auxiliary agents

Metering system DULCODOS[®] modular (DSKa)

Modular and flexible for precise metering

Technical Data

Selectable via the identity code:

- Metering system for the integration of a Sigma product range motor-driven metering pump
- Plastic or stainless steel brackets
- Splash guard
- PP, PVC or PVDF pipework
- EPDM or FPM seals
- VA base with machine feet
- Manometer for commissioning of the back pressure valves
- Hydraulic connectors, (d25 hose nozzles, welding/straight solvent unions, stainless steel sleeves)
- Electrical connectors
- Motor-driven metering pump Sigma

Included in the standard scope of delivery:

- Leak sensor (contained in the standard scope of delivery)
- Flushing connectors with 3-way ball valve
- Pulsation damper with back pressure valve
- Relief valve with return line
- Hose nozzles on suction side and return in d 25
