

Technologies Ecofixe makes a difference

	ECOFIXE /BIOFIXE	New Lagoon	MBBR or SBR	SAGR	Explanation of ECOFIXE and BIOFIXE advantages
Construction Cost	👍	👎 👎	👎	👎	Increasing treatment capacity without new infrastructure for existing sites. Installations that can be built up to 4 times smaller by including the modules in the design.
Energy Efficient	👍	👎	👎 👎	👎	Energy-saving aeration system
Operation staff expertise	👍	👍	👎 👎	👍	No special qualifications required to operate the system. Training given by Ecofixe.
Maintenance	👍	👎	👎 👎	👍	Very simple maintenance operation to be done every month. Requires less than 2 hours.
Installation/construction complexity	👍	👎	👎	👎	Assembly of module done onsite (1-2 weeks) with simple installation within the lagoon.
Transport cost	👍	👎	👎	👎 👎	Parts of disassembled modules and media can be transport on skid.
Flexibility	👍	👎 👎	👎	👎	No need to oversize the structures. If you need additional capacity in the future, simply add modules.
Local investment	👍	👎	👎	👎	At least 50% local manufacturing within Province/State. The assembly is done locally and could be done by the local workforce.
